Reasons to go back...

The perfect way to pamper your guests

What better way to ensure that your guests' come back, than to pamper them in comfortable surroundings designed to stimulate the senses whilst rejuvenating the body.

VOLA water fittings and accessories can help by adding a feeling of wellness as well as pleasing aesthetics to your hotel rooms, ensuring that your customers' will want to return – time and time again.

Simplicity and spirituality

The Hotel Luzern is a deluxe boutique hotel designed by the French architect Jean Nouvel.

The Hotel celebrates simplicity and spirituality as much as it does elegance and refinement. The central idea is to create something quite unlike anything before that provides guests with a magical, exciting and unforgettable feeling.

The Hotel is not just a place to sleep but a reinvention of the hotel experience for the new Millennium era.

Luxury and elegance

The interior of Park Hyatt Seoul, created by the leading Japanese design firm Super Potato, expresses a perfect and unique symbiosis of Asian tradition and modern design.

Opened on April 15th 2005, the Park Hyatt was the first hotel to use the complete program of VOLA solid stainless steel fittings and accessories, shortly after their launch.

The interior design is thus an elegant combination of different materials all of the finest quality that gives the guest a unique aesthetic experience that surpasses cultural boundaries.

Experience life

- is the philosophy of Ininside Premium Hotels Munich Schwabing, Germany.

A stylish ambiance; an exiting interior which features a unique room concept with open bathroom; the futuristic Ininside Premium Hotels Concept is 100 per cent atmosphere, service and pleasure, ensuring a relaxing stay.

VOLA was the perfect choice to meet the high demands of Ininside Premium Hotels.

The classic VOLA design not only adds aesthetic value to each room, its high quality also ensures long and trouble free use.

Contemporary and luxurious but with a natural, organic feel

Hope Street Hotel is a boutique hotel in Liverpool. It was voted as one of the 'fifty coolest hotels in the world' by Condé Nast Traveller.

The style is contemporary and luxurious but with a natural, organic feel that is unafraid of bold statements which is perhaps why it attracts the artistic, as well as the rich and famous, to its doors. The emphasis throughout is on quality, comfort and eye-catching design.

Hope Street Hotel is currently planning a 40 room addition and will, once again, be using VOLA fittings and accessories.

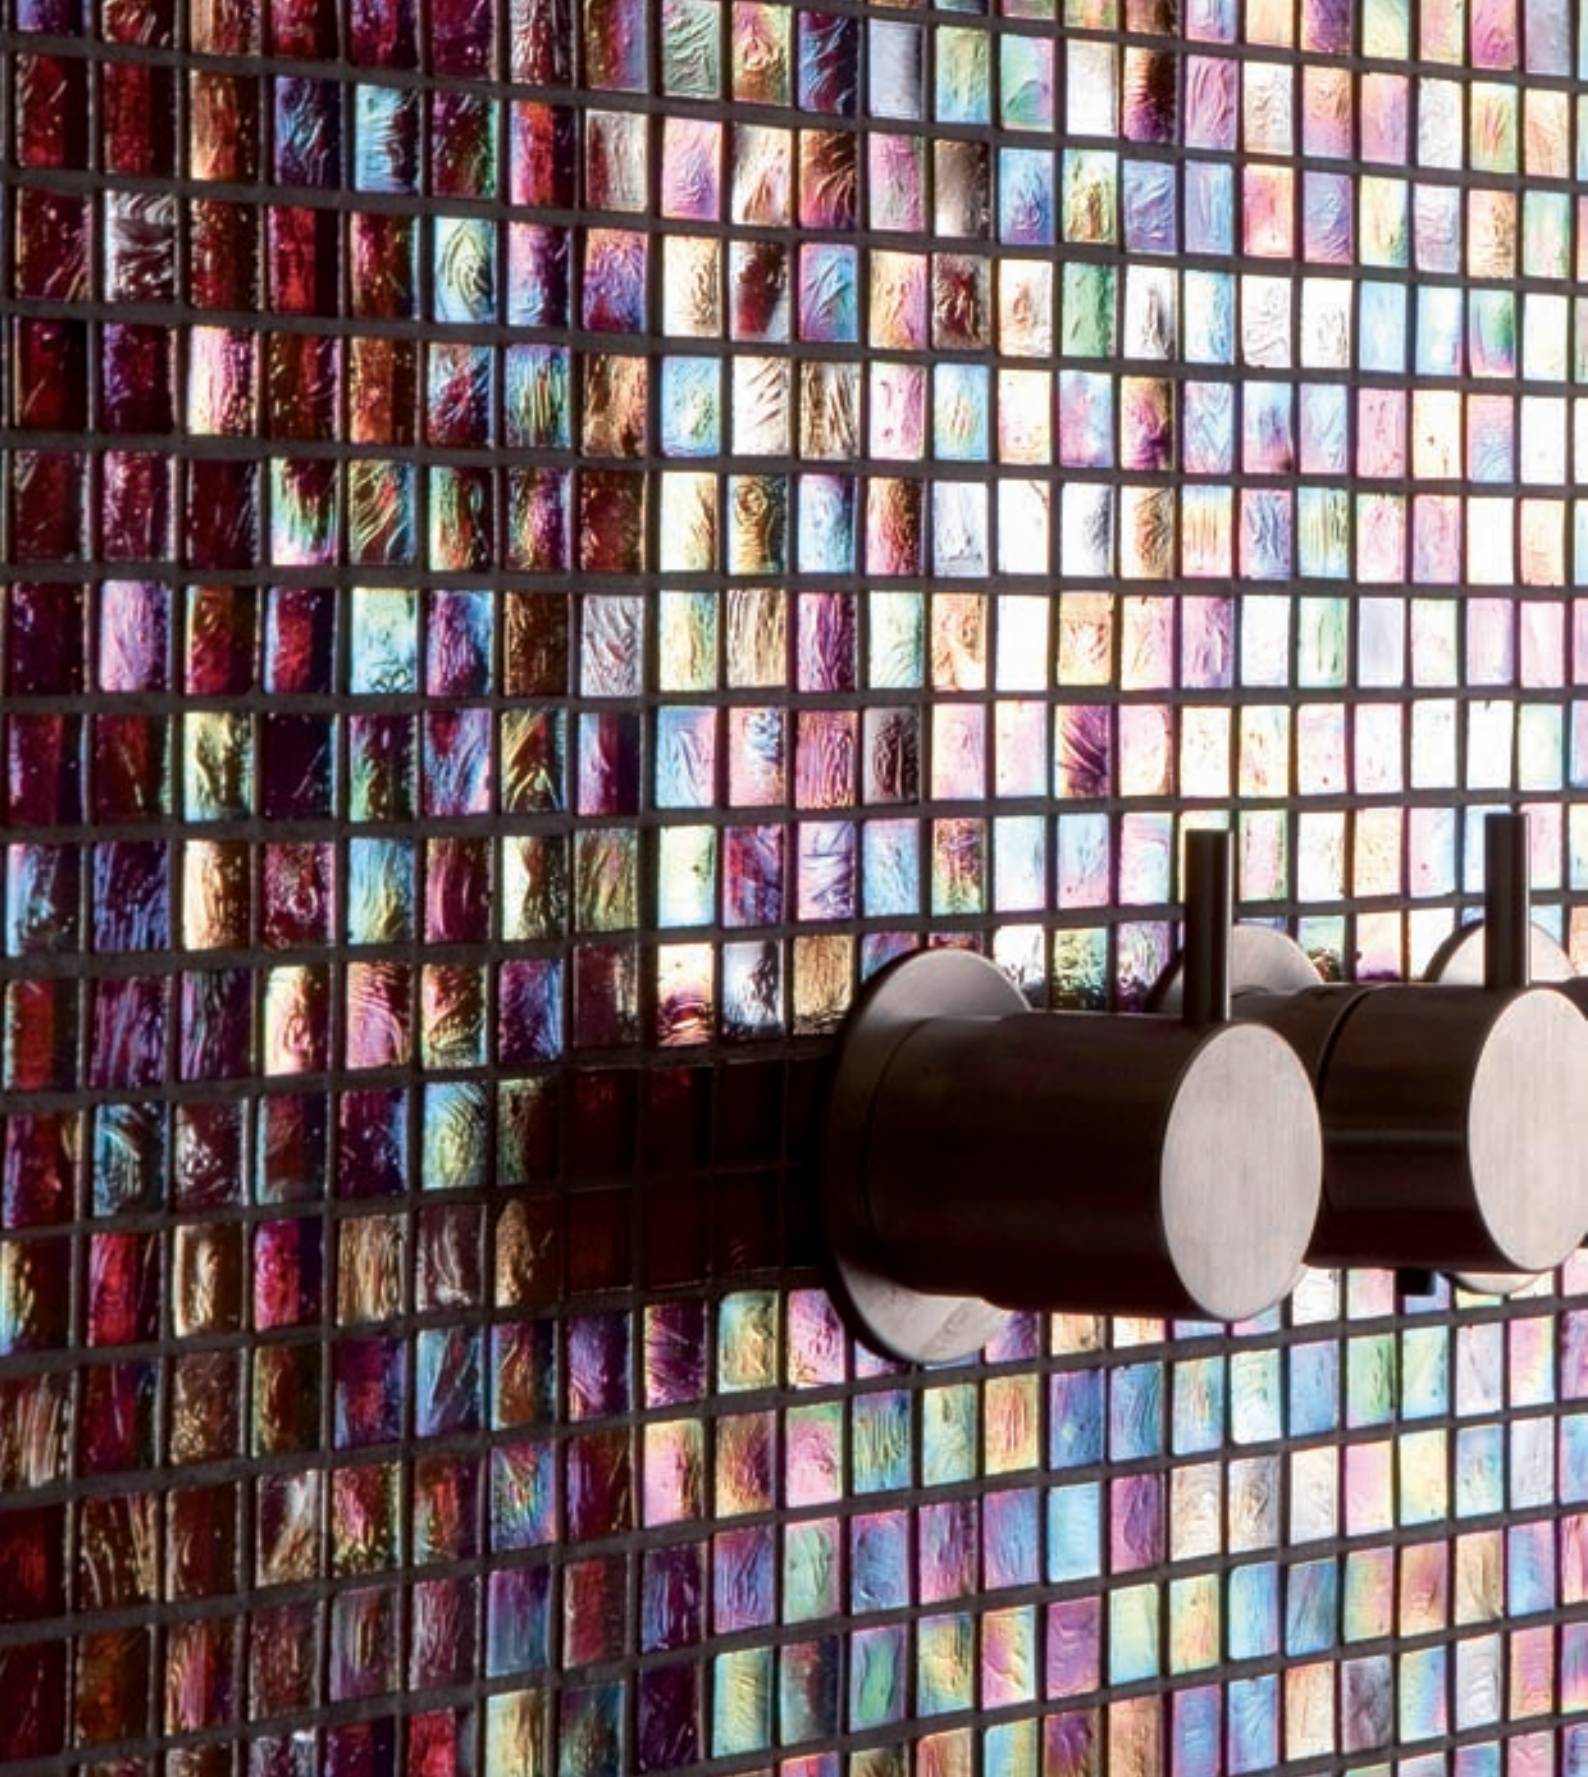

Preserve the environment

The impressive and luxurious 5-star hotel Sofitel Bayerpost is situated in the heart of Munich and offer 396 rooms as well as conference facilities.

In Sofitel Bayerpost, VOLA electronic taps were chosen for the public rooms. This offers the possibility of conscious water consumption by allowing the flow time to be set individually for each tap. The water flow rate can also be controlled with flow regulators which again minimises water consumption keeping costs down. Minimum cleaning and maximum hygiene is also achieved due to the hands free operation method.

2007 GOOD DESIGN award

For almost 40 years, VOLA has represented modern Scandinavian brassware design on the international design scene. During this time VOLA has received many prestigious design awards, the latest being the 2007 GOOD DESIGN award presented by The Chicago Athenaeum Museum of Architecture and Design, for the VOLA F51 free-standing bath filler, launched 2007.

World class architects such as Sir Norman Foster, Sir Richard Rogers, Jean Nouvel and Daniel Liebeskind have all chosen to include VOLA in their world famous buildings.

VOLA - a design icon

Even in today's world of ever-changing trends and fashion, VOLA of Denmark remains an icon, a tribute to a culture that worships pure yet functional design above all else. When the first VOLA taps were designed by Arne Jacobsen in 1968, the minimalist form was seen as a radical departure from existing, traditional ideas of aesthetics and design, and was quick to become a firm favourite with innovative architects and forward-thinking interior designers.

The VOLA range is manufactured in Denmark by VOLA A/S. Founded in 1873, the company is now owned and operated by the Overgaard family.

Only by choosing the very best materials is VOLA able to produce items of such high quality. Mixers, taps and accessories are available in chromed or coloured brass with some parts in gun metal. A large selection of the range is also produced in solid stainless steel. All valve housings are made using dezincification resistant brass.

Each stage of the production process from inspection of the raw material, through to the finished item, is subject to VOLA A/S' intense quality control system based on ISO 9001:2000.
